

Account Leader and Business Director for Southern Water account, Blair's role also includes leadership of the South East Engineering team that supports Thames Water, Thames Tideway and Southern Water.

Blair has over 25 years' experience across the full Water Asset Lifecycle from Asset Management to Programme Delivery having spent the majority of his working life with Scottish Water developing career and experience up until 2010.

With a proven track record in developing and implementing strategies and business plans to deliver regulatory commitments, customer service improvements and operational and capital efficiencies within the Water Sector.

In recent years Blair has supported many of the UK Water companies in the design and implementation of major Business Change Programmes to enable out-performance of Regulatory contracts providing significant insight into sector costs. He has a wealth of knowledge and experience on how supply chain companies operate and how to work in collaboration to deliver maximum efficiencies, with a track record of delivering major Capital Programmes.
